REGULATORY CONTEXT

How Does DSCSA Impact Pharmacies?

The U.S. Congress passed the Drug Supply Chain Security Act (DSCSA), effective November 27, 2024, to protect customers against counterfeit, tainted or stolen pharmaceuticals. For each drug product they buy, sell or exchange, pharmacies must maintain a transaction history, transaction information and a transaction statement.

Pharmacies must verify product identifier information, determine medication validity and have processes in place to respond to package-level National Shortage Data audits. When drug shortages introduce new vendors or NDC alternatives, DSCSA traceability must extend to every substitution purchase.

The Challenges

The vast amount of data pharmacies must handle and store is a major challenge. New software systems and processes are required to manage it successfully.

Significant resources are needed to monitor and confirm authenticity of drug items. When shortages introduce secondary or tertiary vendor purchases, those purchases must meet the same traceability standards as primary vendor transactions.

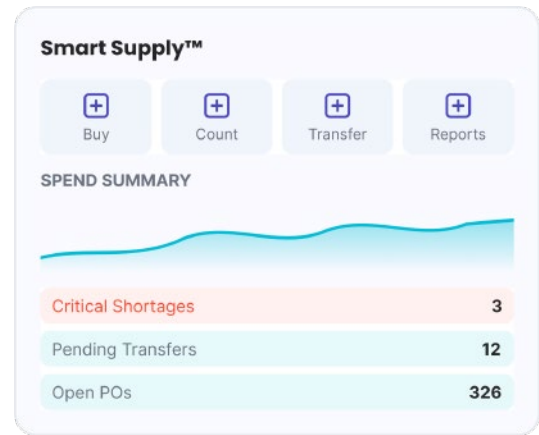

Smart Supply™ Connection: DSCSA Compliance Packages are embedded directly in the Smart Supply™ workflow.

THE SURECOST APPROACH

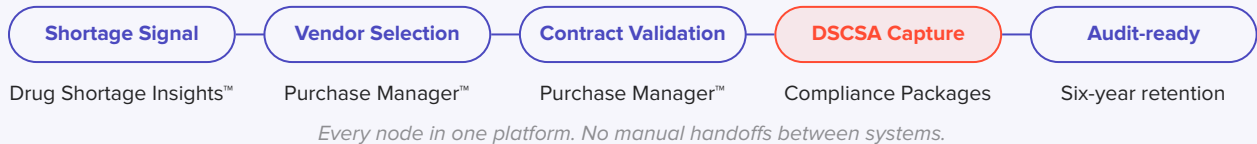

How SureCost Smart Supply™ Helps Pharmacies Comply With DSCSA

SureCost Smart Supply™ ensures pharmacies comply with DSCSA without complicating their work. DSCSA Compliance Packages are embedded in the platform. Compliance is part of the same workflow as purchasing, inventory and shortage management, not bolted on separately.

No swivel chair compliance. When Drug Shortage Insights™ identifies an alternative NDC and Purchase Manager™ executes the purchase, DSCSA traceability data is captured automatically at receiving — same interface, same workflow, no manual handoff.

THE SMART SUPPLY™ WORKFLOW:

PLATFORM VALUE

Consistency, Accountability and Convenience

Consistency

- Instantly scan and capture DSCSA-mandated data upon receiving
- Flag discrepancies if data doesn't match trading partner's EPCIS shipping data
- Six-year electronic storage of DSCSA-compliant transactions for all vendors
- Accommodates EPCIS file requirements including shortage-alternative vendor transactions

Convenience

- Unified platform for compliance, purchasing and inventory; no separate compliance tool needed
- Mobile-app scanning captures core receiving data tied directly to DSCSA-mandated EPCIS files
- Transfer management ensures DSCSA data travels with inventory as it moves across locations
- Critical during shortage-driven redistribution between inpatient, outpatient and specialty sites
- No risk of audit failure from untracked transferred items

Accountability

- Single interface for all product data: centralized, streamlined, audit-ready
- Match physical received items to vendor-provided EPCIS data right at receipt
- Hold traceable items in quarantine when missing compliant EPCIS data
- Purchase Manager™ tracks whether shortage responses used pre-approved alternatives with a full audit trail

Available as:

Stand-alone DSCSA Compliance Packages OR fully embedded within SureCost Smart Supply™ alongside Purchase Manager™, Inventory Manager™ and Drug Shortage Insights™.

PACKAGES AND PRICING

SureCost DSCSA Compliance Packages

All packages include free pharmacy implementation, support and unlimited mobile device access.

The Traceable Receiving Pack

RECEIVING

- EPCIS v1.2+ data retrieval for all compliant vendors
- Rolling six-year retention of DSCSA barcode data (GTIN-14, lot, expiry, serial number)
- Rolling six-year retention of EDI 856 and EPCIS ship events with master data
- Reconcile DSCSA receiving data with vendor EPCIS "T2" transaction data
- Quarantine and track non-compliant traceable items for vendor accountability
- Support returns for traceable items with SureCost mobile app
- Run/schedule email delivery for Traceable Receiving reports (PDF, XLSX, CSV)
- Free pharmacy implementation and support

\$29

per pharmacy/month

The Traceable Transfers Pack

TRANSFERS

- Scan and capture DSCSA barcode data on all inventory transfers
- Capture DSCSA data on all inbound and outbound transfers for all locations
- Capture GTIN-14, lot numbers, expiration dates and serial numbers on all transfers
- Flag non-matching traceable items during inbound transfer receiving
- Quarantine and track non-compliant transferred items for audit protection
- Rolling six-year data retention of all transfer data
- Run/schedule email delivery for Traceable Transfer reports (PDF, XLSX, CSV)
- Free pharmacy implementation and support

\$29

per pharmacy/month

**Transfer Module not included*

The Traceable Receiving and Transfers Bundle

BEST VALUE — SAVE 15%

- Complete compliance assurance combining both Traceable Receiving and Traceable Transfers Packs
- Cover all bases to minimize risk and maximize confidence across all sites
- Streamlined audit preparation for all inventory including shortage-alternative purchases
- With regulatory requirements constantly evolving, stay ahead and avoid surprises
- Focus on patient care while the bundle manages compliance complexities
- All features from both packs included

\$49

per pharmacy/month

**Transfer Module not included*

All packages include free pharmacy implementation, support and unlimited mobile device access.

Part of SureCost Smart Supply™

DSCSA Compliance Packages are a module competency available stand-alone or embedded within Smart Supply™ alongside Purchase Manager™, Inventory Manager™ and Drug Shortage Insights™. When combined, compliance is enforced at every step, from shortage signal to purchase to receiving to audit — in one workflow.
